

GUIA PARA CREAR API KEY GOOGLE MAPS SIN TARJETA DE CREDITO NI CUENTA DE FACTURACION

<https://developers.google.com/maps/documentation/android-sdk/get-api-key>

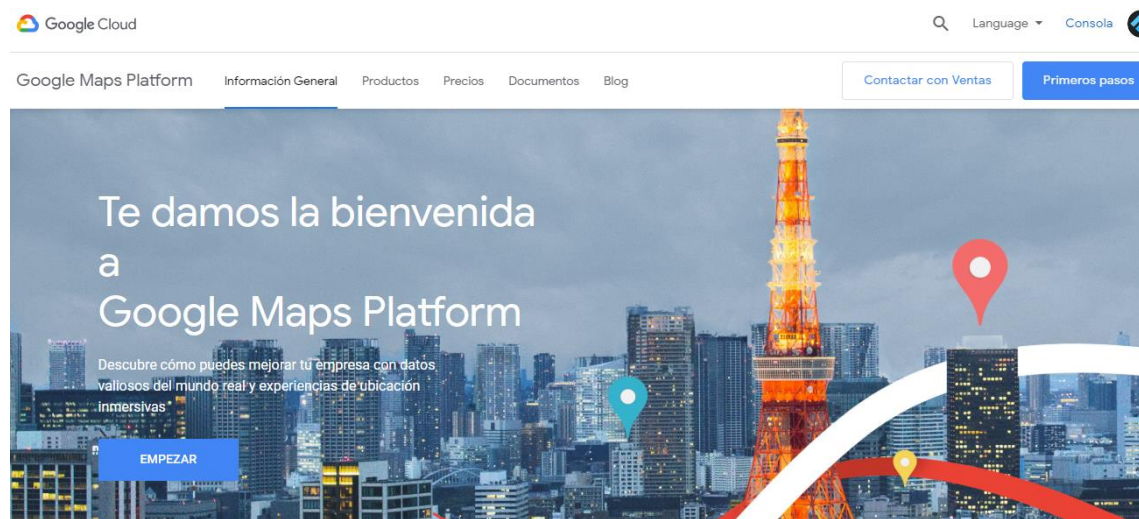

The screenshot shows the 'Get an API Key' page on the Google Maps Platform documentation. The page is titled 'Get an API Key' and includes a sidebar with navigation links like 'Overview', 'Get Started', 'Configuration', 'Tutorials', and 'Creating a Map'. The main content area explains that an API key is needed to use the Maps SDK for Android and provides a 4-step guide: 1. Go to the Google Cloud Platform Console. 2. From the Project drop-down menu, select or create the project for which you want to add an API key. 3. From the Navigation menu, select APIs & Services > Credentials. 4. On the Credentials page, click Create credentials > API key.

Click en Cancelar

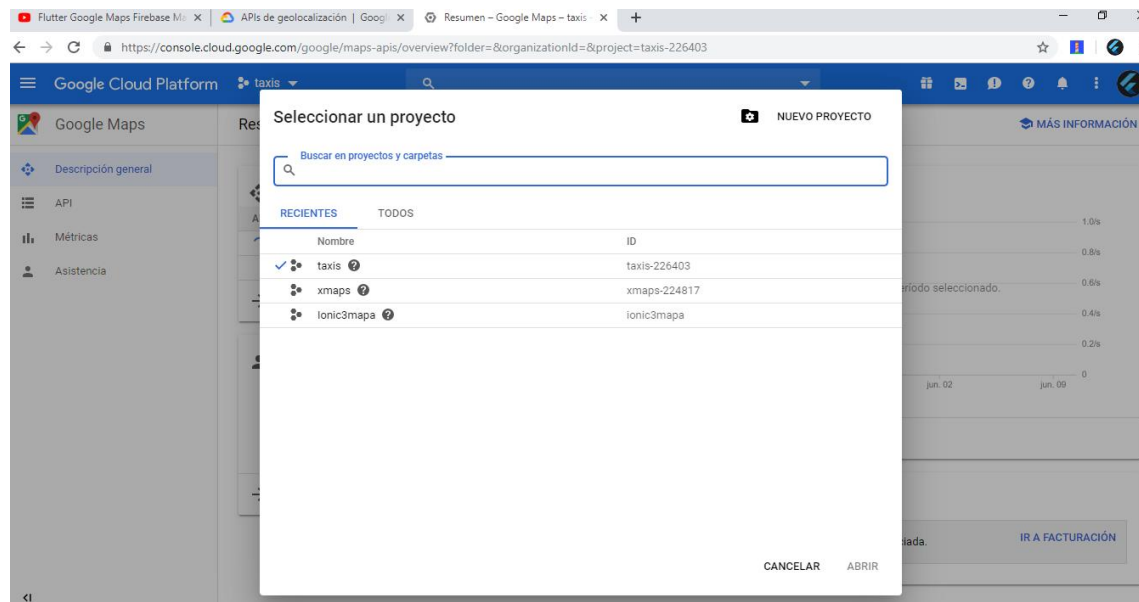

The screenshot shows the 'Habilita Google Maps Platform' dialog in the Google Cloud console. The dialog prompts the user to follow steps to enable APIs or configure billing. It lists three options: 'Maps' (checked), 'Routes', and 'Places'. The 'Maps' option is selected, and the 'CONTINUAR' button is highlighted. The background shows a cityscape with a red location pin.

Selecciona el proyecto

The screenshot shows the Google Cloud Platform console interface. The top navigation bar includes the Google Cloud Platform logo and a dropdown menu with 'mapflutter' selected. Below the navigation bar, there is a search bar and a list of APIs and services. The list includes:

- Geolocation API: Location data from cell towers and WiFi nodes.
- Maps SDK for Android: Maps for your native Android app.
- Roads API: Snap-to-road functionality to accurately trace GPS breadcrumbs.
- Places API: Get detailed information about 100 million places.
- Maps JavaScript API: Maps for your website.
- Maps Embed API: Make places easily discoverable with Interactive Google Maps.
- Time Zone API: Time zone data for anywhere in the world.
- Distance Matrix API: Travel time and distance for multiple destinations.
- Maps SDK for iOS: Maps for your native iOS app.
- Maps Elevation API: Elevation data for any point in the world.

Habilitar

The screenshot shows the Google Cloud Platform console interface for the 'Maps SDK for Android' API. The page title is 'Maps SDK for Android' by Google. The description is 'Maps for your native Android app.' Below the description is a blue button labeled 'HABILITAR'.

Descripción general

Add maps based on Google Maps data to your Android application with the Maps SDK for Android. The SDK automatically handles access to Google Maps servers, map display and response to user gestures and drags.

Acerca de Google

Google's mission is to organize the world's information and make it universally accessible and products and platforms like Search, Maps, Gmail, Android, Google Play, Chrome and YouTube, a meaningful role in the daily lives of billions of people.
